DETAILED ACTION

Drawings

1. Figures 2, 3, 4, 5, 6, 9, and 12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The seed crystal is claimed as a perovskite. However, no guidance as to the choice of a perovskite seed crystal other than Barium Titanate is given in the Disclosure.

3. Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one

Art Unit: 1765

skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The disclosure gives no indication of the secondary abnormal grain growth activating temperature.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by the phrase "...a continuous growth of the same structure as the seed crystal...". The phrase suggests the possibility of differing structures between the seed and the grown crystal.

5. Claim 1 recites the limitation "the combination" in line 5. There is insufficient antecedent basis for this limitation in the claim.

6. Claim 8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The methods disclosed are for growing crystals from seeds adjoined to polycrystals and not for growing single seed crystals. Also, the seed is required as an material ingredient.

Art Unit: 1765

7. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "predetermined" is indefinite.

8. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what constitutes a "desired" or "complex" shape.

9. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what the porosity, pore size and pore shape are compared with when determining their "different" character.

10. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how to choose from the group consisting of "solutes to be solved".

Art Unit: 1765

11. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what "to be solid-solved" encompasses.

12. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The metes and bounds of the shape "[un-reproducible character]" are not unambiguously defined.
